Product Description

Human Maternal Blood is collected from all types of pregnancies at varying gestations and demographics in 10 mL aliquots.

Fresh products have a high viability without the detrimental effects of freezing, thawing, and exposure to cryoprotectants.

Maternal blood was obtained using Institutional Review Board (IRB) approved consent forms and protocols.

Sample Collection and Processing

All samples are collected at our Stem Cell Collection Centers or nearby partner hospitals and clinics. Samples are then quickly processed at our on-site laboratory to achieve maximum viability and quality.

Format

Fresh maternal blood is shipped at ambient temperature.

Storage

Fresh products should be used or processed immediately upon receipt. The warranty only covers items whose specifications are tested at the time they are received.

Warning

This product contains human tissue or other biological material and MUST be handled at Biosafety Level 2 or higher. All biological products should be treated as potentially infectious or contaminated material, even if infectious disease screening reports are negative. Follow universal precautions and wear appropriate personal protective equipment.

Product Warranty

For our product warranty, please review our Terms and Conditions at stemexpress.com/terms-and-conditions/.
