What is MyChart?

MyChart is a free application that offers you a personalized and secure on-line access to portions of your medical record. It enables you to securely manage and receive information regarding your COVID-19 testing appointments and test results.

How do I sign up?

You will be issued a MyChart activation code during your visit at a StemExpress testing location. This code will enable you to log in and create your own username and password. If you were not issued an activation code, you may call StemExpress to get one. You will be able to sign up for MyChart without an activation code as well.

When can I see my test results in MyChart?

Your test results are released to your MyChart account within 24-72 hours of your test being received at our lab.

Who do I contact for further questions?

You may e-mail us at MyChart@stemexpress.com.

Or you can contact us using our MyChart Patient Support Line at (530) 317-7003.
